- OSOPUS/OSMUR

- Comments on Friday Mission Progress Report, 1 March -  
22 April

**REFERENCE**

BGAA-9802 (KAPOK-2579)

1. Headquarters wishes to commend Field on the reference. This type of report is an invaluable aid in providing support and in monitoring the operation.
2. The anti-dog devices have been forwarded as an attachment to SCAW-4916.
3. On reading the referenced dispatch, the following questions were suggested, the answers to which we would appreciate in some future dispatch:
  - a. Exactly what was AIKHAVE told about the Friday Mission? (paragraph 2)
  - b. What is the significance to Friday, if the safehouse were blown? (paragraph 3)
  - c. Will letters for AIKHED be mailed from Kalamita? (paragraph 11)
  - d. Exactly how much was told to [ ] [ ] (paragraph 17)
  - e. To what does HATROGH attribute the ambush? (paragraph 19)
  - f. We assume that no security breach was committed in the episode between HEDOLLAR and AIHET. We would appreciate assurances for the record.
4. The answers to some of these questions are fairly obvious to anyone who has followed Albanian operations. However, ideally a project file should be self-explanatory and complete, so that any future study can be made

without resort to personal contact with the officers involved on the project. In addition, the system of security reviews will raise such questions as those posed above and it will save future work if they are answered in the course of normal operational reporting.
